Volume 21 (2005)

Aiona, M.D., see Orendurff, M.S. **21**, 157
Anand, V., see Buckley, J.G. **21**, 59
Andreucci, E., see Crenna, P. **21**, 311
Apperson, K., see Keefer, D.J. **21**, 80
Armand, S., M. Mercier, E. Watelain, K. Patte, J. Pelissier, F. Rivier, A comparison of gait in spinal muscular atrophy, type II and Duchenne muscular dystrophy **21**, 369

Bajd, T., see Kuželički, J. **21**, 1
Bartonek, Å., see Gutierrez, E.M. **21**, 12
Beltrami, G., see Schmid, M. **21**, 255
Bhatt, T., J.D. Wening, Y.-C. Pai, Influence of gait speed on stability: recovery from anterior slips and compensatory stepping **21**, 146
Bobbert, M.F., see Pijnappels, M. **21**, 388
Bono, R., see Crenna, P. **21**, 311
Brauer, S., see Treleaven, J. **21**, 395
Brouwer, W.H., see Huitema, R.B. **21**, 440
Brunt, D., V. Santos, H.D. Kim, K. Light, C. Levy, Initiation of movement from quiet stance: comparison of gait and stepping in elderly subjects of different levels of functional ability **21**, 297
Buckley, J.G., K.J. Heasley, P. Twigg, D.B. Elliott, The effects of blurred vision on the mechanics of landing during stepping down by the elderly **21**, 65
Buckley, J.G., V. Anand, A. Scally, D.B. Elliott, Does head extension and flexion increase postural instability in elderly subjects when visual information is kept constant? **21**, 59
Burger, H., see Kuželički, J. **21**, 1

Cappello, A., see Cutti, A.G. **21**, 341
Cappozzo, A., see Chiari, L. **21**, 197
Cappozzo, A., see Leardini, A. **21**, 212
Cappozzo, A., U. Della Croce, A. Leardini, L. Chiari, Human movement analysis using stereophotogrammetry. Part 1: theoretical background **21**, 186
Caputo, J.L., see Keefer, D.J. **21**, 80
Casadio, M., P.G. Morasso, V. Sanguineti, Direct measurement of ankle stiffness during quiet standing: implications for control modelling and clinical application **21**, 410
Cavanagh, P.R., see Hamel, K.A. **21**, 135
Chen, W.-Y., see Wu, W.-L. **21**, 263
Cheng, Y.-M., see Wu, W.-L. **21**, 263
Chiari, L., see Cappozzo, A. **21**, 186
Chiari, L., see Della Croce, U. **21**, 226
Chiari, L., see Leardini, A. **21**, 212
Chiari, L., U.D. Croce, A. Leardini, A. Cappozzo, Human movement analysis using stereophotogrammetry. Part 2: Instrumental errors **21**, 197
Crenna, P., E. Fedrizzi, E. Andreucci, C. Frigo, R. Bono, The heel-contact gait pattern of habitual toe walkers **21**, 311
Croce, U.D., see Chiari, L. **21**, 197
Croce, U.D., see Leardini, A. **21**, 212
Crowdy, K.A., see Marple-Horvat, D.E. **21**, 39
Cutti, A.G., G. Paolini, M. Troncossi, A. Cappello, A. Davalli, Soft tissue artefact assessment in humeral axial rotation **21**, 341
Cuyper, F.D., see Detrembleur, C. **21**, 333

Davalli, A., see Cutti, A.G. **21**, 341
De Clercq, D., see De Cock, A. **21**, 432
De Clercq, D., see Willems, T. **21**, 379
De Cock, A., D. De Clercq, T. Willems, E. Witvrouw, Temporal characteristics of foot roll-over during barefoot jogging: reference data for young adults **21**, 432
De Cock, A., see Willems, T. **21**, 379
Dekker, R., see Huitema, R.B. **21**, 440
Delbaere, K., see Willems, T. **21**, 379
Della Croce, U., A. Leardini, L. Chiari, A. Cappozzo, Human movement analysis using stereophotogrammetry. Part 4: assessment of anatomical landmark misplacement and its effects on joint kinematics **21**, 226
Della Croce, U., see Cappozzo, A. **21**, 186
Della Croce, U., see Mazzà, C. **21**, 425
Detrembleur, C., J.-M. Vanmarsenille, F.D. Cuyper, F. Dierick, Relationship between energy cost, gait speed, vertical displacement of centre of body mass and efficiency of pendulum-like mechanism in unilateral amputee gait **21**, 333
Dierick, F., see Detrembleur, C. **21**, 333
Diezi, C., see Stacoff, A. **21**, 24
Dorociak, R.D., see Orendurff, M.S. **21**, 157
Dubois, P., see Wearing, S.C. **21**, 326

Elise Johanson, M., see Radtka, S.A. **21**, 303
Elliott, D.B., see Buckley, J.G. **21**, 59, 65
Elzinga, H., see Hof, A.L. **21**, 171

Subject index

Volume 21 (2005)

Acceleration; Gait; Locomotion; Variability; Step width **21**, 164

Accuracy; Precision; Foot; X-ray; Motion analysis **21**, 326

Aged; Gait; Falls; Fear of falling; Gait variability; Higher-level gait disorders **21**, 178

Ageing; Prism paradigm; Realignment; Heading stability; Proprioception **21**, 440

Ageing; Treadmill; Walking; Temporal-distance gait measurements; Knee kinematics **21**, 72

Aging; Stairs; Lighting; Falls; Tripping; Foot clearance **21**, 135

Aging; Stopping; Gait termination; Electromyography; Walking **21**, 279

Alignment; Ankle sprain; Risk factors; Plantar pressure; Kinematics **21**, 379

Amputee gait; Centre of pressure **21**, 255

Amputee; Energy cost; Pendulum mechanism; Gait **21**, 333

Anatomical landmark; Stereophotogrammetry; Human movement; Joint kinematics **21**, 226

Angular momentum; Fall prevention; Postural control; Perturbation; Strength **21**, 388

Ankle muscle activation; Gait initiation; Anticipation; Forces; Elderly **21**, 289

Ankle sprain; Risk factors; Plantar pressure; Kinematics; Alignment **21**, 379

Ankle stiffness; Posture; Force platform; Stability **21**, 410

Anthropometry; Gait; Pediatrics; Kinetics; Kinematics **21**, 141

Anticipation; Gait initiation; Ankle muscle activation; Forces; Elderly **21**, 289

Australopithecus; Primate locomotion; Scoliosis; Spondylolysis; Hominid **21**, 95

Australopithecus; Wolff's law; Osteoporosis; Cancellous bone; Hominid **21**, 113

Balance loss; Gait stability; Stepping response; Level walking; Fall prevention **21**, 146

Balance; Whiplash; Wavelet analysis; Total sway distance; Computerized Dynamic Posturography **21**, 395

Biomechanics; Motion analysis; Spina bifida; Joint moments; Pathological gait **21**, 12

Biomechanics; Plantar pressure; Slow running; Foot roll-over; Reference data **21**, 432

Body sway; Center of pressure; Sum of maximal deviation time **21**, 48

Calibrated anatomical system technique; Movement analysis; Humeral axial rotation; Soft tissue artefact; Stereophotogrammetry **21**, 341

Cancellous bone; Wolff's law; Osteoporosis; *Australopithecus*; Hominid **21**, 113

Center of pressure; Body sway; Sum of maximal deviation time **21**, 48

Centre of gravity; Undisturbed upright stance control; Head position; Centre of pressure; Frequency analysis; Fractional Brownian motion modelling **21**, 318

Centre of pressure; Amputee gait **21**, 255

Centre of pressure; Undisturbed upright stance control; Head position; Centre of gravity; Frequency analysis; Fractional Brownian motion modelling **21**, 318

Cerebellum; Gaze; Saccades; Human; Stepping **21**, 39

Cerebral palsy; Gait analysis; Orthosis **21**, 303

Cerebral palsy; Habitual toe walking; Idiopathic toe walking; Ontogeny of gait **21**, 311

Cerebral palsy; Stability; Oxygen consumption **21**, 80

Children; Froude number; Gait; Dynamic similarity; Walking; Size; Gravity **21**, 350

Clinical gait analysis; History; Kinetics; Energy cost **21**, 447

Compensation; Human movement analysis; Experiments; Soft tissue artifacts; Minimization **21**, 212

doi:10.1016/S0966-6362(05)00052-4

Computerized Dynamic Posturography; Balance; Whiplash; Wavelet analysis; Total sway distance **21**, 395

Duchenne muscular dystrophy; Gait analysis; Spinal muscular atrophy **21**, 369

Dynamic optimization; Standing-up; Prostheses; Trans-femoral amputation **21**, 1

Dynamic similarity; Froude number; Gait; Walking; Size; Gravity; Children **21**, 350

Elderly; Gait initiation; Anticipation; Ankle muscle activation; Forces **21**, 289

Elderly; Postural stability; Head flexion; Head extension; Vision **21**, 59

Elderly; Stepping; Gait initiation; Falls **21**, 297

Elderly; Stiffness; Visual impairment; Falling; Stepping **21**, 65

Human walking; Electromyogram; Speed dependence; Intersubject variation **21**, 171

Human; Gaze; Saccades; Cerebellum; Stepping **21**, 39

Humeral axial rotation; Movement analysis; Soft tissue artefact; Stereophotogrammetry; Calibrated anatomical system technique **21**, 341

Idiopathic toe walking; Habitual toe walking; Ontogeny of gait; Cerebral palsy **21**, 311

Intersubject variation; Electromyogram; Human walking; Speed dependence **21**, 171

Joint kinematics; Stereophotogrammetry; Human movement analysis **21**, 186

Joint kinematics; Stereophotogrammetry; Human movement; Anatomical landmark **21**, 226

Joint moments; Motion analysis; Spina bifida; Biomechanics; Pathological gait **21**, 12

Kinematics; Ankle sprain; Risk factors; Plantar pressure; Alignment **21**, 379

Kinematics; Gait; Pediatrics; Anthropometry; Kinetics **21**, 141

Kinetics; Gait; Pediatrics; Anthropometry; Kinematics **21**, 141

Kinetics; History; Energy cost; Clinical gait analysis **21**, 447

Knee kinematics; Treadmill; Walking; Temporal-distance gait measurements; Ageing **21**, 72

Knee OA; Gait analysis system; Locus of dynamic loading axis; Motion capture analysis; Open MRI **21**, 125

Landing; EMG; Vision; Reflexes **21**, 85

Lateral movement of loading axis; Gait analysis; Locus of dynamic loading axis; High tibial osteotomy; Motion capture analysis **21**, 271

Length; Gastrocnemius; Soleus; Force; Velocity; Gait **21**, 157

Level walking; Gait stability; Balance loss; Stepping response; Fall prevention **21**, 146

Lighting; Stairs; Aging; Falls; Tripping; Foot clearance **21**, 135

Locomotion; Gait; Variability; Acceleration; Step width **21**, 164

Locus of dynamic loading axis; Gait analysis system; Knee OA; Motion capture analysis; Open MRI **21**, 125

Locus of dynamic loading axis; Gait analysis; High tibial osteotomy; Motion capture analysis; Lateral movement of loading axis **21**, 271

Measurement errors; Human movement analysis; Optoelectronic stereophotogrammetry; Spot-check; Experiment design **21**, 197

Minimization; Human movement analysis; Experiments; Soft tissue artifacts; Compensation **21**, 212

Motion analysis; Accuracy; Precision; Foot; X-ray **21**, 326

Motion analysis; Spina bifida; Joint moments; Biomechanics; Pathological gait **21**, 12

Motion capture analysis; Gait analysis system; Locus of dynamic loading axis; Knee OA; Open MRI **21**, 125

Motion capture analysis; Gait analysis; Locus of dynamic loading axis; High tibial osteotomy; Lateral movement of loading axis **21**, 271

Motor ability assessment; Sit-to-stand; Upright posture; Ground reaction forces **21**, 425

Movement analysis; Humeral axial rotation; Soft tissue artefact; Stereophotogrammetry; Calibrated anatomical system technique **21**, 341

Ontogeny of gait; Habitual toe walking; Idiopathic toe walking; Cerebral palsy **21**, 311

Open MRI; Gait analysis system; Locus of dynamic loading axis; Knee OA; Motion capture analysis **21**, 125

Optoelectronic stereophotogrammetry; Human movement analysis; Measurement errors; Spot-check; Experiment design **21**, 197

Orthosis; Cerebral palsy; Gait analysis **21**, 303

Osteoporosis; Wolff's law; *Australopithecus*; Cancellous bone; Hominid **21**, 113

Oxygen consumption; Stability; Cerebral palsy **21**, 80

Pathological gait; Motion analysis; Spina bifida; Joint moments; Biomechanics **21**, 12

Pediatrics; Gait; Anthropometry; Kinetics; Kinematics **21**, 141

Pendulum mechanism; Energy cost; Amputee; Gait **21**, 333

Perturbation; Fall prevention; Postural control; Angular momentum; Strength **21**, 388

Plantar pressure; Ankle sprain; Risk factors; Kinematics; Alignment **21**, 379

Plantar pressure; Slow running; Biomechanics; Foot roll-over; Reference data **21**, 432

Postural control; Fall prevention; Perturbation; Angular momentum; Strength **21**, 388

Postural stability; Head flexion; Head extension; Elderly; Vision **21**, 59

Posture; Ankle stiffness; Force platform; Stability **21**, 410

Precision; Accuracy; Foot; X-ray; Motion analysis **21**, 326

Primate locomotion; Scoliosis; Spondylolysis; *Australopithecus*; Hominid **21**, 95

Prism paradigm; Ageing; Realignment; Heading stability; Proprioception **21**, 440

Proprioception; Ageing; Prism paradigm; Realignment; Heading stability **21**, 440

Prostheses; Standing-up; Dynamic optimization; Trans-femoral amputation **21**, 1

Realignment; Ageing; Prism paradigm; Heading stability; Proprioception **21**, 440

Recovery strategy; Gait perturbation; Stumbling; Energy analysis **21**, 243

Reference data; Plantar pressure; Slow running; Biomechanics; Foot roll-over **21**, 432

Reflexes; Landing; EMG; Vision **21**, 85

Rehabilitation; Hemiplegia; Equilibrium; Standing posture; Force platform **21**, 403

Risk factors; Ankle sprain; Plantar pressure; Kinematics; Alignment **21**, 379

Saccades; Gaze; Cerebellum; Human; Stepping **21**, 39

Scoliosis; Primate locomotion; Spondylolysis; *Australopithecus*; Hominid **21**, 95

Sit-to-stand; Upright posture; Motor ability assessment; Ground reaction forces **21**, 425

Size; Froude number; Gait; Dynamic similarity; Walking; Gravity; Children **21**, 350

Slow running; Plantar pressure; Biomechanics; Foot roll-over; Reference data **21**, 432

Soft tissue artefact; Movement analysis; Humeral axial rotation; Stereophotogrammetry; Calibrated anatomical system technique **21**, 341

Soft tissue artifacts; Human movement analysis; Experiments; Minimization; Compensation **21**, 212

Soleus; Gastrocnemius; Length; Force; Velocity; Gait **21**, 157

Speed dependence; Electromyogram; Human walking; Intersubject variation **21**, 171

Spina bifida; Motion analysis; Joint moments; Biomechanics; Pathological gait **21**, 12

Spinal muscular atrophy; Gait analysis; Duchenne muscular dystrophy **21**, 369

Spondylolysis; Primate locomotion; Scoliosis; *Australopithecus*; Hominid **21**, 95

Spot-check; Human movement analysis; Optoelectronic stereophotogrammetry; Measurement errors; Experiment design **21**, 197

Stability; Oxygen consumption; Cerebral palsy **21**, 80

Stability; Posture; Ankle stiffness; Force platform **21**, 410

Stair climbing; Triple arthrodesis; Gait **21**, 263

Stairs; Aging; Lighting; Falls; Tripping; Foot clearance **21**, 135

Stairs; Gait analysis; Force curves; Variability; Symmetry **21**, 24

Standing posture; Hemiplegia; Equilibrium; Rehabilitation; Force platform **21**, 403

Standing-up; Dynamic optimization; Prostheses; Trans-femoral amputation **21**, 1

Step width; Gait; Locomotion; Variability; Acceleration **21**, 164

Stepping response; Gait stability; Balance loss; Level walking; Fall prevention **21**, 146

Stepping; Gait initiation; Falls; Elderly **21**, 297

Stepping; Gaze; Saccades; Cerebellum; Human **21**, 39

Stepping; Stiffness; Elderly; Visual impairment; Falling **21**, 65

Stereophotogrammetry; Human movement analysis; Joint kinematics **21**, 186

Stereophotogrammetry; Human movement; Anatomical landmark; Joint kinematics **21**, 226

Stereophotogrammetry; Movement analysis; Humeral axial rotation; Soft tissue artefact; Calibrated anatomical system technique **21**, 341

Stiffness; Elderly; Visual impairment; Falling; Stepping **21**, 65

Stopping; Gait termination; Electromyography; Aging; Walking **21**, 279

Strength; Fall prevention; Postural control; Perturbation; Angular momentum **21**, 388

Stumbling; Gait perturbation; Recovery strategy; Energy analysis **21**, 243

Sum of maximal deviation time; Body sway; Center of pressure **21**, 48

Symmetry; Gait analysis; Stairs; Force curves; Variability **21**, 24

Temporal-distance gait measurements; Treadmill; Walking; Knee kinematics; Ageing **21**, 72

Total sway distance; Balance; Whiplash; Wavelet analysis; Computerized Dynamic Posturography **21**, 395

Trans-femoral amputation; Standing-up; Dynamic optimization; Prostheses **21**, 1

Treadmill; Walking; Temporal-distance gait measurements; Knee kinematics; Ageing **21**, 72

Triple arthrodesis; Stair climbing; Gait **21**, 263

Tripping; Stairs; Aging; Lighting; Falls; Foot clearance **21**, 135

Undisturbed upright stance control; Head position; Centre of pressure; Centre of gravity; Frequency analysis; Fractional Brownian motion modelling **21**, 318

Upright posture; Sit-to-stand; Motor ability assessment; Ground reaction forces **21**, 425

Variability; Gait analysis; Stairs; Force curves; Symmetry **21**, 24

Variability; Gait; Locomotion; Acceleration; Step width **21**, 164

Velocity; Gastrocnemius; Soleus; Length; Force; Gait **21**, 157

Vision; Landing; EMG; Reflexes **21**, 85

Vision; Postural stability; Head flexion; Head extension; Elderly **21**, 59

Visual impairment; Stiffness; Elderly; Falling; Stepping **21**, 65

Walking; Froude number; Gait; Dynamic similarity; Size; Gravity; Children **21**, 350

Walking; Stopping; Gait termination; Electromyography; Aging **21**, 279

Walking; Treadmill; Temporal-distance gait measurements; Knee kinematics; Ageing **21**, 72

Wavelet analysis; Balance; Whiplash; Total sway distance; Computerized Dynamic Posturography **21**, 395

Whiplash; Balance; Wavelet analysis; Total sway distance; Computerized Dynamic Posturography **21**, 395

Wolff's law; Osteoporosis; *Australopithecus*; Cancellous bone; Hominid **21**, 113

X-ray; Accuracy; Precision; Foot; Motion analysis **21**, 326
